

Tomás Bizet de Barros

FULL-STACK WEB ENGINEER

Rio de Janeiro, RJ

+55 021 97222-0504 | tbizetde@gmail.com | NasreddinHodja

Summary

Full-stack and software engineer with 6 years of experience designing and delivering scalable web and mobile systems. Proven ability to lead end-to-end development and architect reliable infrastructures. Strong background in TypeScript, modern web frameworks, and applied data science, underpinned by formal training in computer science and mathematical reasoning.

Experience

RPeotta – Soluções Integradas de Engenharia

Rio de Janeiro, RJ

DATA & AUTOMATION ENGINEER

Nov. 2025 – Feb. 2026

- Led modernization of the Planning sector's workflows, building data pipelines and tooling to replace legacy Excel-based processes.
- Designed and implemented ETL and consolidation pipelines for internal project planning and management.
- Architected a LAN-hosted web application (Svelte, Python, MS SQL Server) serving as a unified hub for all internal tools.
- Replaced spreadsheet-driven planning with a structured visual system, improving operational efficiency across the sector.

Themia-SAS

Rio de Janeiro, RJ

SOFTWARE ENGINEER — FULL-STACK

Mar. 2025 – Oct. 2025

- Delivered a complete referral system from API design to production: Next.js front-end, Stripe & Clerk webhooks, Prisma schema and all backend endpoints.
- Supported data pipelines with small-scale ETL scripts.

EcoDoctor

Rio de Janeiro, RJ

SOFTWARE ENGINEER — FULL-STACK

Mar. 2022 – Apr. 2025

- Built a digital healthcare platform connecting hospitals and doctors across web and mobile, using TypeScript, Nuxt, and Supabase.
- Architected and implemented a real-time chat system (front-end and back-end).
- Designed and delivered a DORA metrics dashboard for internal engineering analytics.
- Designed the architecture for a scheduling and duty-management system for hospital staff.
- Led full migration from Nuxt/TypeScript to Flutter, unifying mobile and web deployments.

World Bank Group, 29 Analytics

Rio de Janeiro, RJ

DATA SCIENCE CONSULTING

Jan. 2020 – Dec. 2021

- Collaborated with the World Bank and 29 Analytics on fraud detection in Brazil's public sector.
- Designed ETL pipelines for large-scale governmental data; contributed to anomaly detection models using Python and Pandas.
- Developed a Django REST API to expose fraud-pattern analytics.

Education

Universidade Federal do Rio de Janeiro

Rio de Janeiro, RJ

BACHELOR'S OF COMPUTER SCIENCE

2016 – 2025

- *Scientific initiation*: "Geodesic Convexity Number for Dually Chordal Graphs" — in-depth study on graph theory, geodesic convexity, and algorithmic complexity.
- *Algorithm & Programming Competitions (Extension Project)* — taught Python to public school students, ran OBI prep courses, participated in the 2017 Programming Marathon and SNCT.

Skills

Frameworks Vue.js / Nuxt, React / Next.js, Flutter, Django

Programming TypeScript, Python, Dart, C / C++, Rust

Languages Portuguese (native), French (fluent), English (fluent)

Tools Supabase, Docker, PostgreSQL, Git, GNU/Linux, Vitest
